

Email Forensic Intelligence Report

SIH 2026 · PS ID 26106 · Team Tech Titans (Prototype-stage report)
Case ID: FR-9BADD8CE07 | Generated: 2026-09-15 19:15:32 UTC

Threat Assessment

Fraud Score	30 / 100
Verdict	LOW RISK

- Urgency (+20): immediately

Email Summary

From	Google Account Team
Reply-To	—
Subject	Security alert: New sign-in detected on your Google Account
Message-ID	

Authentication Check (SPF / DKIM / DMARC)

Sending Domain	accounts.google.com
SPF	VALID
DMARC	VALID
DKIM Signature	ABSENT

Domain Intelligence

Lookalike Domain	None detected
MX Records	alt1.gmr-smtp-in.l.google.com, alt2.gmr-smtp-in.l.google.com, alt3.gmr-smtp-in.l.google.com, alt4.gmr-smtp-in.l.google.com, gmr-smtp-in.l.google.com
Registration Date	Unavailable
Registrar	Unavailable

Mail Path Reconstruction

Hop 1 — Probable Origin: 137.184.34.4 (1627707.cloudwaysapps.com) — Santa Clara, United States — DigitalOcean, LLC
Hop 2 — Final Visible Mail Server: 209.85.220.69 (mail-sor-f69.google.com) — Mountain View, United States — Google LLC

Origin Attribution Confidence

- Confidence: 55%**
- ✓ Earliest public IP successfully extracted from Received headers
 - ✓ SPF record aligned for sending domain
 - ✗ DKIM signature present
 - ✓ DMARC policy published and found
 - ✗ Reverse DNS of originating IP matches sending domain

X Sending domain has an established registration history

Threat Actor Techniques Observed

- X Display Name / Reply-To Spoofing
- X Brand Impersonation (Lookalike Domain)
- ✓ Social Engineering / Urgency Pressure
- X Credential Harvesting Language
- ✓ Infrastructure Spoofing (Proxy/TOR/Hosting Origin)
- ✓ Failed Sender Authentication
- X Malware/Attachment Delivery

Indicators of Compromise (IOC)

Sender IP	137.184.34.4
Sender Domain	accounts.google.com
URLs in body	None found
Attachment Hash	Not analyzed — attachments are out of scope for this prototype

Origin Trace & Geolocation

Originating IP	137.184.34.4
Country	United States
City / Region	Santa Clara, California
ISP / Org	DigitalOcean, LLC
Proxy / TOR / VPN	No
Hosting/Cloud IP	YES

Campaign Correlation

- Shares originating IP + sender domain with previous case: "Security alert: New sign-in detected on your Google Account" (analyzed 2026-09-13T06:43:40)
- Shares originating IP + sender domain with previous case: "Security alert: New sign-in detected on your Google Account" (analyzed 2026-09-15T15:31:32)
- Shares originating IP + sender domain with previous case: "Security alert: New sign-in detected on your Google Account" (analyzed 2026-09-15T15:40:05)

- Shares originating IP + sender domain with previous case: "Security alert: New sign-in detected on your Google Account" (analyzed 2026-09-15T19:15:17)

Recommended Actions

- No action required — email shows no significant fraud indicators

Forensic Conclusion

The analyzed email was transmitted through infrastructure consistent with accounts.google.com's legitimate mail servers, with authentication checks passing. Attribution confidence is 55%. No evidence of spoofing or relay manipulation was found; assessed as LEGITIMATE.

Prototype scope note: this report is generated by a rule-based scoring engine standing in for the production NLP/BERT model; cross-case correlation uses a local case store standing in for the planned Neo4j graph-scale implementation. This is not a substitute for professional legal or security review.
